## Smart Cup

flow-controlled drinking cup  
A smart alternative to "sippy" cups

[www.reflo.net](http://www.reflo.net)

Thank you for purchasing a Reflo Smart Cup... a smart alternative to "sippy" cups, which have been associated with speech delays and dental problems.

This revolutionary innovation will teach your child how to use a standard drinking cup without big spills,

The cup and insert are both BPA-free, phthalate-free and dishwasher safe.

**Please read and follow all instructions and tips** for proper use and care of your new Reflo Smart Cup.

### Instructions

Be sure to wash your new cup and Reflo insert before using.

#### How to assemble and use:

1. Add up to six ounces of pulp-free beverage to the cup. (See Fig. 1)
2. Place the Reflo insert evenly into the cup with tabs facing up.
3. Apply firm pressure to the insert for a secure fit.
4. You're ready to use your new Reflo cup. Your child can drink from any portion of the rim as you would normally use a regular drinking cup.

#### Removal of the insert:

1. Simply twist and pull out.

### Tips and Features

Your Reflo Smart Cup...

- ...should not be used for hot liquids or drinks containing pulp or thickeners.
- ...is dishwasher safe, BPA free and designed for better hygiene with no valves/parts to trap germs and debris.
- ...has all translucent components so it's easy to see contents for training purposes, safety and convenience.
- ...does not pose the speech and dental risks associated with "sippy" cups.
- ...is splash resistant when shaken, making it well-suited for cup holders on strollers and in your vehicle.
- ...is not spill proof when tipped or dropped, much like any regular cup.
- ...Will operate the same regardless of what part of the rim your child drinks from, just like any regular cup but with the added benefit of flow control.
- ...is designed for parents concerned about providing their children with a safer, smarter way to learn how to drink from an open-rimmed cup.
- ...Not for throwers, cups may crack if thrown or dropped onto hard surfaces such as tile floors.
